

# Roman Divkovic

SYSTEM DEVELOPER

## Profile

Currently working in the IT-department at Capio Sweden as a junior software developer with the whole stack.

Finished my studies in App development for IOS & Android in Gothenburg, Sweden.

I have skills in Android Studios with Java, MYSQL and firebase for backend development with C# in .NET as well, Objective-C & Swift for IOS development in Xcode, React-Native for cross-platform development also Vue for websites.

Fluent in Swedish, English and Serbo-Croatian both orally and written.

Don't hesitate to contact me if you want to hear more about me and what I can do for your company.

## Employment History

### Software Developer, Capio AB

AUGUST 2022 – PRESENT

As a Software Developer at Capio, I've worked with both the front-end with react and react native in both Javascript & Typescript and #C and .NET in the back-end. I've worked with everything from, fixing bugs update and adding new features. A lot of work with mostly front-end where there was a lot to fix with bugs and add new features the company needed.

## Education

### Applikationsutvecklare , IT-Högskolan

JANUARY 2020 – JUNE 2022

### Applikationsutvecklare , Gardenize AB, Göteborg

JANUARY 2022 – MAY 2022

Second internship was at Gardenize, where I and my friend from class decided to do it at. I would work on the iOS-development and he on the android because the company has two native apps. We jumped in directly and started to work on a new feature, to send out push notifications when a storm is coming to prepare the garden.

## Internships

### System Developer, Find Sourcing, Gothenburg

SEPTEMBER 2021 – NOVEMBER 2021

Did my first internship at Findsourcing, where I and another from my class had an internship together at the company. We had to create an application from scratch, which will make it easier to get tariff codes for users. So instead of having to go in thru the customs site and look it up, you can easily answer some questions and get the right code. We made the application using Javascript and with react-native
