Location
Gothenburg, Sweden

TECHNICAL SKILLS

Frontend
React · TypeScript · JavaScript
Vue · HTML5 · CSS3

Mobile
React Native · Expo
Swift · Native iOS

Backend & data
C# / .NET · Node.js · MySQL
Firebase Authentication
Firebase Realtime Database
REST APIs · AsyncStorage

Azure & delivery
Azure DevOps · Azure Repos
Azure Pipelines · PR checks
Expo EAS · Maestro
Azure Front Door familiarity

Tools & practices
Git · GitHub · CI/CD · Figma
ESLint · Prettier · audit-ci
Reusable components

Currently learning
Flutter

LANGUAGES

Swedish — Native
English — Fluent
Serbo-Croatian — Native

Profile

Software developer at Capio Sweden with practical experience across web and mobile development. Builds interfaces with React and TypeScript, with React Native and Swift experience from internships and personal projects. Uses Azure DevOps daily and has configured pull-request CI checks required before merging. Expanding application development skills through projects involving Firebase authentication and shared data.

Professional experience

Software Developer

Capio Sweden — IT Department — 2022 – Present

- Build and maintain web applications and internal tools, developing React and TypeScript frontends and collaborating on C# / .NET services.
- Use Azure Repos and pull requests; configure CI checks covering audit-ci vulnerability scans, Prettier, ESLint, type checking and automated tests.
- Run Expo EAS workflows with Maestro testing in Azure Pipelines, with checks required before merging; navigate Azure Front Door in daily work.

Founder & Operations Manager

Lost Luggage Delivery Service — Landvetter Airport — 2019 – 2021

- Ran a delivery service handling lost luggage from Landvetter Airport; managed five drivers and coordinated pickups and deliveries.
- Organized scheduling, logistics and customer communication.

Internships

Software Developer Intern

Resourced (formerly Find Sourcing) — 2021

- Developed a React and React Native application that simplified tariff-code lookup through a guided question-and-answer flow.

iOS Developer Intern

Gardenize — 2020

- Contributed to native iOS application features using Swift and Firebase as part of a small development team.

Selected projects

Household & Pet Management App | Former team project

- Built a cross-platform app using React Native, Expo, JavaScript, Firebase Authentication and Firebase Realtime Database. No longer involved following a buyout of my stake.

Basketball Management Game | In development

- Developing an Expo and TypeScript app across two projects, centred on starting a basketball coaching career. Uses AsyncStorage for local, on-device persistence; no SQL database currently.

BetBuddys — UFC Predictions | Currently inactive

- React and TypeScript web project for UFC predictions and friendly competition. Private groups, scoring and event/annual leaderboards form the intended feature set.

Education

App Development for iOS

Nackademin — Higher Vocational Education — 2019 – 2021

Swift · iOS architecture · UI/UX · REST APIs · Firebase · MySQL
